Profile Summary

With 13 years of specialized experience in front-end engineering, I have deep expertise in **Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS**, and modern UI/UX practices. I excel in designing and architecting **scalable, modular, and high-performance web applications**, with hands-on proficiency in responsive design, accessibility (WCAG), state management (RxJS, NgRx), and performance optimization (lazy loading, code splitting, Web Vitals). My experience spans the full lifecycle of web development—**architecture, configuration, testing, deployment, and maintenance**—ensuring reliable, future-ready solutions.

Technical Skills

Frontend: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Material UI, Kendo UI, SyncFusion UI, Bootstrap,

State Management: NgRx, RxJS

Testing: Jasmine, Karma, Protractor, Cypress

Tools & Platforms: Git, GitHub, GitLab, Jenkins, Webpack, Node.js, NPM/Yarn

API & Backend: REST API, JSON, Firebase

Other: Agile/Scrum, Responsive Design, Cross-browser Compatibility, Performance Optimization

Professional Experience

ANGULAR TEAM LEAD | SHRUNTECH SOLUTION | OCT 2023 – PRESENT

- Developed and maintained dynamic, responsive single-page applications using Angular 17+.
- Implemented state management with NgRx, optimizing component interactions and reducing memory leaks.
- Improved application performance by 25% through lazy loading, code-splitting, and AOT compilation.
- Integrated REST APIs with robust error handling and optimized HTTP requests using RxJS.
- Conducted unit testing using Jasmine & Karma, achieving >90% code coverage.
- Collaborated with designers and backend engineers in Agile sprints, participating in code reviews and CI/CD pipelines.

TEAM LEAD | MOON TECHNO LAB | FEB 2023 – SEP 2023

- Improved Angular 14 application efficiency by 20% through strategic package optimization.
- Mentored and guided team members, enhancing skill development and productivity.
- Directed daily activities, prioritized tasks, and collaborated with management to align business priorities.
- Engineered a customized Angular module for a client, reducing development time by 40% and boosting productivity by 25%.
- Enhanced back-end performance by constructing a RESTful API, improving response times by 30%.

SENIOR SOFTWARE ENGINEER| BIZSALT TECHNOLOGY PVT LTD| FEB 2023 – SEP 2023

- Developed and migrated web applications using Angular 10 and TypeScript.
- Implemented responsive web design with HTML, CSS, SASS, and Flexbox.
- Integrated Telerik & Kendo UI for efficient data representation and filtering.
- Engineered HTTP client for backend interaction and modularized the application using Ng-Module.
- Developed custom pipes and directives for real-time data transformations.
- Implemented NgRx for session, authentication, and administrative management.

SENIOR SOFTWARE ENGINEER| GATEWAY GROUP OF COMPANIES | APR 2016 – NOV 2021

- Executed codebase improvements to enhance quality and mobile compatibility.
- Developed single-page applications using AngularJS, HTML5, CSS3, and JavaScript.
- Mentored junior engineers, optimizing workflow and reducing development time by 20%.
- Collaborated with designers and backend developers for seamless integration of APIs and dashboards.

SOFTWARE ENGINEER| IBDTD | APR 2014 – APR 2016

- Resolved end-user issues and maintained databases with SQL queries.
- Built interactive user experiences using AJAX, Material Design, and Bootstrap.
- Implemented ASP.NET authentication methods and integrated third-party APIs.

SOFTWARE ENGINEER| JUPITER SYSTEM | DEC 2012 – APR 2014

- Developed ASP.NET web applications with C#, HTML, CSS, JavaScript, and jQuery.
- Built responsive layouts optimized for mobile devices.
- Created web forms and maintained content controls across the website.

JUNIOR ENGINEER| MATRIX NETWORK & SOLUTIONS | OCT 2011 – NOV 2012

- Evaluated libraries and frameworks for application development.
- Performed unit testing and collaborated with developers to optimize solutions.

Projects

#1: KUBE PLUS – ENTERPRISE HOSPITAL DIGITALIZATION SUITE

- Technologies: Angular 17, TypeScript, RxJS, Sync Fusion, HTML5, CSS3, SCSS/SASS, Flexbox, Bootstrap, Node.js, RxJs, Lodash, Git CI/CD
- Description:
 - Architected and restructured a digital hospital management platform to centralize operations, streamline scheduling, and digitize core workflows such as patient admissions, discharges, appointments, and prescriptions.
 - Developed critical modules including medical laboratories (pathology, radiology, X-ray, Cath lab), billing and invoicing systems, and patient transfer workflows across hospitals, ensuring accuracy, efficiency, and continuity of care.
 - Engineered advanced dashboards for surgery, anesthesia clinics, and emergency triage, alongside occupancy and room management modules to optimize resource utilization and real-time patient flow.
 - Enhanced security and usability through role-based access for staff, digital patient documentation, clinical history tracking, and nursing dashboards with real-time monitoring for improved care and staff productivity

#2: MAKASSET – DIGITAL HOSPITAL TRANSFORMATION

- Technologies: Angular 16, TypeScript, RxJS, NG Forms, NGX Charts, xlsx, NGX- Library, JsPDF, HTML5, CSS3, SASS, Bootstrap, Express.js, Node.js, Git CI/CD
- Description:
 - Architected and developed a digital hospital management platform to streamline scheduling, admissions, discharges, transfers, digital orders, and prescriptions, improving operational efficiency.
 - Implemented secure, role-based access control, enabling physicians, supervisors, nurses, and administrators to access relevant modules.
 - Designed and delivered dynamic dashboards for Nursing and Emergency departments, providing real-time monitoring and activity tracking.
 - Optimized patient and staff record management by centralizing data into a secure, accessible system with automated logging and auditing.
 - Enhanced data visualization and reporting using NGX Charts and xlsx, enabling faster decision-making for clinical and administrative teams.
 - Improved deployment efficiency by integrating Git-based CI/CD pipelines, ensuring seamless updates and reduced downtime.

#3: DELMONTE COMPREHENSIVE PRODUCT MANAGEMENT & SALES MONITORING SYSTEM

- Technologies: Angular 14, TypeScript, RxJS, NG Forms, NGX Charts, SASS, Bootstrap, Node.js, Express.js, Git CI/CD
- Description:
 - Digitally transformed product lifecycle management by developing a centralized web application to track records, activities, and agreements, improving operational accuracy and compliance.
 - Monitored sales performance (monthly and yearly) with advanced reporting and data visualizations using NGX Charts, enabling informed decision-making by sales leadership.
 - Streamlined order management for sales, freight, and direct store deliveries, while automating returns and credit memo approvals, boosting customer satisfaction and reducing turnaround time.
 - Enhanced pricing and product grouping modules, improving product mapping accuracy and simplifying large-scale data analysis.
 - Improved collaboration within sales teams by integrating role-based modules and dashboards, resulting in greater visibility and performance tracking.
 - Developed reusable Angular components and services, ensuring consistency, scalability, and maintainability across the platform.

#4: EASY INVOICE MANAGEMENT

- Technologies: Angular 10, HTML, CSS, Angular Material, TypeScript, RxJs, Ng Form, NGX Charts, Web-Pack, Angular Libraries, PWA, Service-worker
- Description:
 - Boosted application performance by conducting in-depth audits with Lighthouse and Web Vitals, identifying bottlenecks, and implementing optimizations for responsiveness.
 - Optimized image assets by compressing PNG/JPEG with TinyPNG/ImageOptim and introducing WebP formats, along with integrating ngx-image-optimizer and image-webpack-loader to reduce load times without quality loss.

- Reduced application footprint by evaluating and replacing heavy third-party libraries with lightweight alternatives, while upgrading the service worker for asset caching, offline support, and faster page loads.
- Enhanced system capabilities by establishing WebUSB API with Zadig for direct thermal printer integration and implementing auxiliary routing with detailed logging to improve debugging and traceability.

#5: SALES & PURCHASE CRM

- Technologies: Angular 10, Twitter Bootstrap, HTML, CSS3, TypeScript, Redux, RxJs, Observables, Ng-Forms, REST APIs, Git
- Description:
 - Led the design and development of a scalable, responsive UI using Angular 10 and TypeScript, applying mobile-first principles to ensure seamless cross-device compatibility and engaging user experiences.
 - Architected reusable Angular services and modular structures, enabling efficient CRUD operations, streamlined API integration, and performance optimization across multiple applications.
 - Delivered tailored business modules (Admin, Customer, Pricing, Supplier, Seller) by collaborating with clients to translate complex workflows into intuitive solutions, enhancing usability and adaptability.

#6: VEHICAL LEASE QUOTE

- Technologies: Angular 7, Angular 11, HTML, SCSS, CSS3, Angular Material, SASS, TypeScript, Redux, RxJs, Observables, RxFormBuilder, NGX Charts, REST APIs, Azure DevOps, Git, Google Map API
- Description:
 - Migrated and modernized Angular applications by upgrading from Angular 4 controllers to Angular 7 components, configuring projects with Angular CLI, and building reusable, test-driven components with Angular Material, SCSS, and dynamic forms.
 - Integrated backend services using @ng-openapi-gen to generate .NET Core API Swagger objects, RxFormValidation, and caching mechanisms via HTTP interceptors, improving performance and reducing redundant API calls.
 - Implemented robust state management with NgRx, Redux, and RxJS, enabling scalable handling of complex data flows while designing common utility services and reusable filters to improve maintainability.
 - Ensured quality and collaboration by applying Git for version control, Agile methodologies (Scrum, sprint planning, reviews), and best practices in CI/CD, delivering reliable and maintainable single-page application architecture.

Education

BACHELOR OF ENGINEERING | COMPUTER ENGINEERING – SARVAJANIK COLLEGE OF ENGINEERING & TECHNOLOGY | 64%

DIPLOMA IN ENGINEERING | COMPUTER ENGINEERING – TAPI ENGINEERING COLLEGE | 73%

Skills & Abilities

- Problem Solving & Critical Thinking
- Attention to Detail & Accuracy
- Adaptability & Flexibility
- Time Management & Prioritization
- Collaboration & Cross-Functional Coordination
- Communication & Presentation Skills
- Creativity and Innovation
- Analytical & Logical Thinking
- Empathy and Customer-Centric Mindset

Language

- English – B2 (Upper Intermediate)
- Hindi – C1 (Advance)
- Gujarati – C1 (Advance)
